STEM Saturday celebrates the arrival of Spring

Spring is on the horizon, and it's the perfect season for your youth to explore a career in meteorology. Bring your K-8th grade students to STEM Saturday, where they will participate in hands-on activities about something we experience daily: WEATHER.

Students will:

- Investigate the impacts of climate change on global weather patterns and the Earth's water cycle.
- Explore a variety of tools to measure temperature, wind, and air pressure through experimentation.
- Understand the variety of metrics that scientists use to predict weather patterns.
